

## TKB Investment Partners – Balanced Russia

### Investment objective

Balanced Russia is a fund that can be attractive for those seeking to make long-term investments that offer a balanced yield/risk ratio. The fund is designed to generate rouble yields via active allocations between various asset classes and foreign currencies.

Balanced Russia comprises two parts:

- 1) The more conservative part of the fund is invested in a wide range of rouble-denominated bonds issued by what the fund managers consider to be the most stable, attractive, actively growing and predominantly Russian companies operating within Russia and/or the CIS
- 2) The rest of the fund is invested in a broad array of both Russian and foreign equities and bonds with a strong yield potential.
